About the E-Conference

An idea about CSR has both ethical and philosophical dimensions particularly in India where there is a wide gap between income and standard of living among different sections of society. In the situation of Covid-19 pandemic the Government of India appealed the corporate houses to donate either in the PM cares Fund or for various other purposes that can be contributed for protecting, healing and preventing the common man from the covid-19 pandemic.

Effective CSR gives a company the power to stand out in today's saturated market and connect with customers on a level that ensures long term loyalty and potentially even brand advocacy.

CSR activities may not necessarily have violated the letter of law but the spirit of such activities is what is required to be looked on whether CSR activities of the companies have fulfilled the objectives of CSR in real sense or whether the objectives of CSR are fulfilled in reality or whether the transparency is maintained in CSR activities or whether the corporate and NGO partnership has achieved their predetermined targets amid Covid-19 pandemic. Hence the theme of E-Conference is Corporate Social Responsibility: In India, amid Covid-19 pandemic.

About Conference: According to genome sequencing reports, omicron has been found in 84% of covid-samples recently tested. The city also recorded two covid-related deaths over the past 24 hours, a health bulletin said. Meanwhile, the eastern state of Odisha also recorded its highest single-day jump in cases in over three months on Tuesday, as 680 more people tested positive. The reproduction rate of the virus, or the rate at which the virus spreads, which largely remained below the replacement level of 1.0 since last June, has also ticked upward, reaching 1.37 on January 1. Given the rapid rise in cases, the government has already reduced the physical attendance of both government and private employees in offices by 50%. People with disabilities and pregnant women have also been exempted from going into offices. Schools, colleges, gyms, swimming pools and parks have been shut down in several states and nighttime curfews have been ordered. Although Omicron is more infectious than the delta variant, officials say that the rate of hospitalisation is likely to be lower. Also, hospitals are better prepared now than they were last year. At the beginning of December, two people in the southern state of Karnataka tested positive for the Omicron variant of the coronavirus, marking India's first recorded cases of the strain.
